### Professional Summary

I am a senior front-end developer with three years of meaningful contributions, both as a sole product owner and as part of teams of varying size and scope. In order to continuously learn and grow as a developer, I have developed a tendency to accept feedback from senior and junior developers alike. I have experience driving projects forward as the front-end development team lead, regardless of whether it's a legacy project or a new concept. I aim to tackle more complex problems and continue to find ways of improving user experience.

### Education
